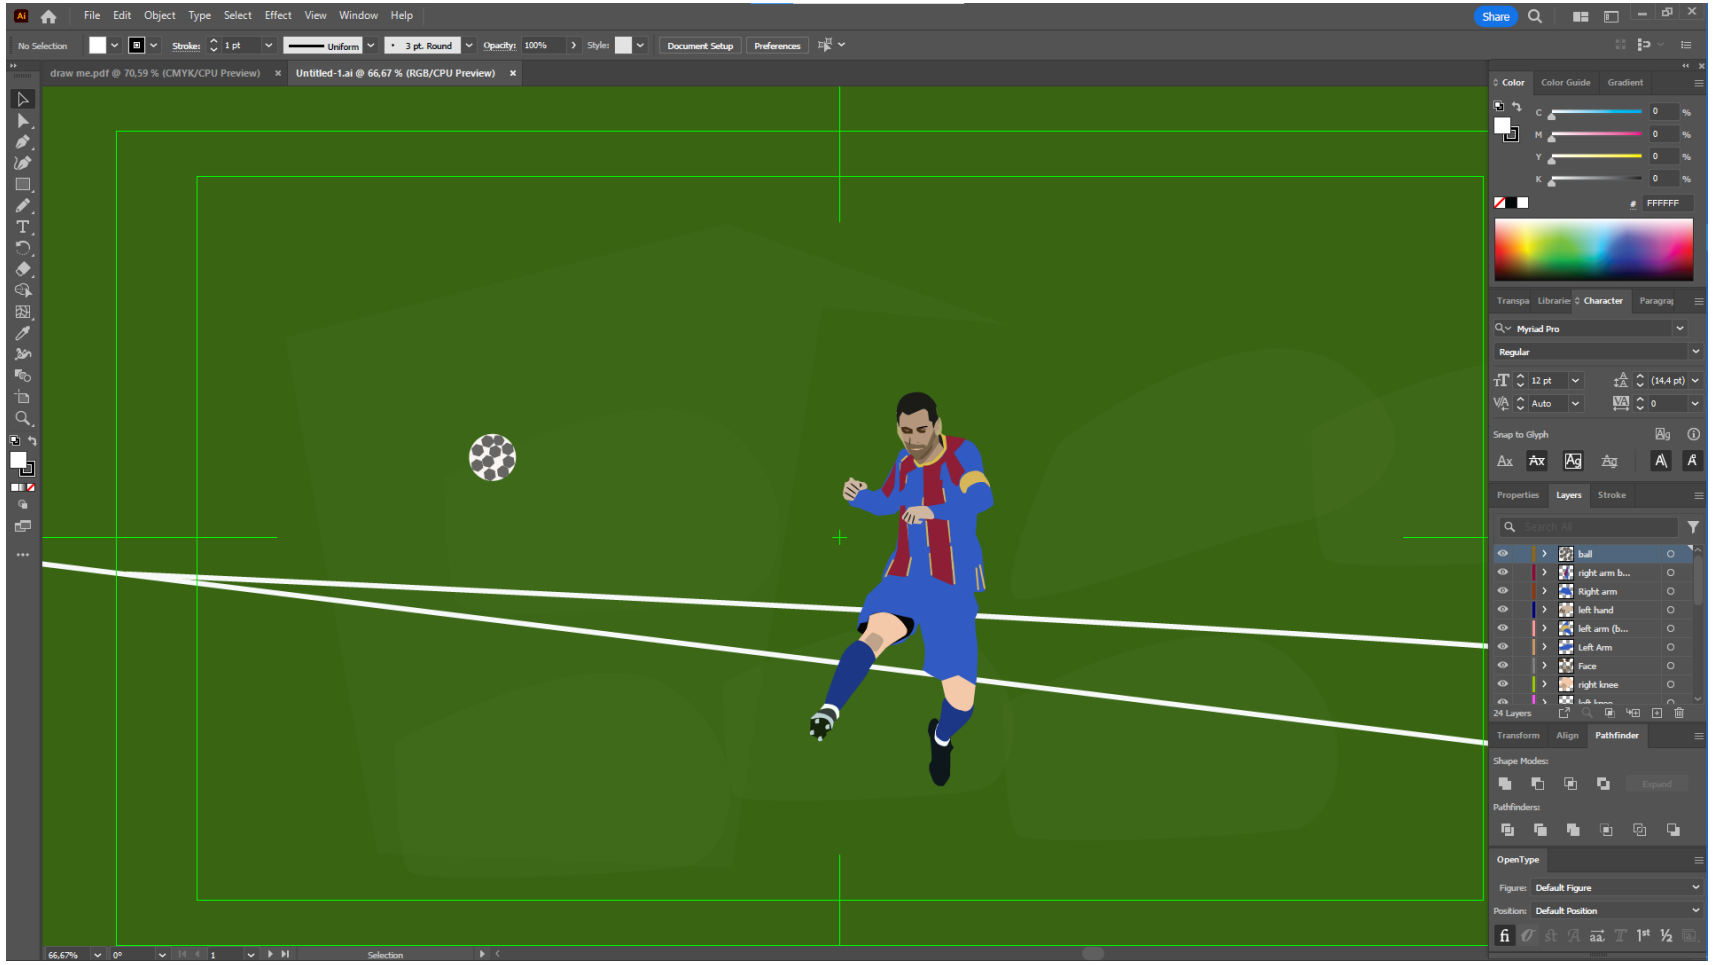
Course: Interactive Media

NQF Level: Level 05

Designs with Illustrator

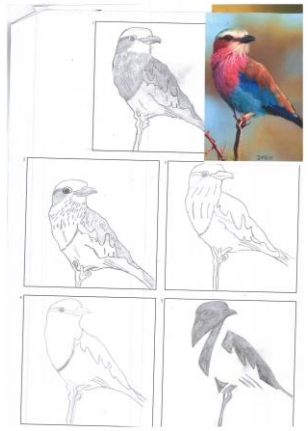


An Illustration of A soccer player, Soccer ball and the field

It digital drawn using Illustrator software and tools to showcase all details and make it look interesting and more real

A logo design from a real plant.
The process involved

- Doing research about the company I was making this Logo for
- Searching for a proper plant
- Pen and paper to extract unnecessary details
- Digitalizing possible design and searching for fonts
- Finalizing the design



Nyoni Tours

Designing a logo from a live picture and do a 5 step detail extraction until a possible shape of the logo comes up.

WeThinkCode CEO_Nyari Samushonga

Business letterhead for Inyoni Tours

THE CAREER PORTAL BY WETHINKCODE CEO

Background

Nyari Samushonga initially worked as an accountant, gaining experience across various industries. However, she eventually felt disconnected from the regular story aspects of auditing and desired for something that is more creative and impactful.

EDUCATION

Discovery Of Coding

At the age of 30, Nyari discovered the world of coding through a software consulting company. She realized that coding allowed her to create solutions for real-world problems, and it ignited her passion. Unlike her previous role, coding didn't box her into a specific industry; she could work across diverse environments.

WeThinkCode

Nyari joined WeThinkCode_ a software development academy that recruits South African youth aged 17 to 35 to learn how to code. As the CEO, she is committed to empowering others with this valuable skill set. WeThinkCode_ offers coding courses, making it an excellent choice for anyone interested in building a career in software development.

Student Testimonials

"I found the best place where tech has been made simple and easy to learn. I joined WeThinkCode in 2019 straight from high school and I must say I do not regret the decision I made. So far I've learnt a lot through the peer-to-peer environment and I've gained skills which I can actually use in a workplace. The course itself is very tough I don't wanna lie but one thing that has kept me pushing is GRIT one of the core values you need to survive. I have also been able to adapt quickly to new languages/technologies out there using the knowledge from WeThinkCode_. So if you have any interest in the wold of tech I would urge you to start applying."_ *By Thulani Nyama*

"Overall I've had good experience at Wethinkcode. They teach you avery important skill and that's self-growth. You're all on your own at Wethinkcode. That's where the beauty in it lies. You choose what you want to improve at and the pace is set by yourself. You'll learn to be more organized, self-motivating and you'll definitely have exposure to cutting edge tech and software engineering concepts."_*By Ruben Goutzer*

"WeThinkCode_ is a peer to peer learning environment. We learn from each other and have really hard bootcamps. It's all worth it. WeThinkCode gives us the tools."_ *By Takalani Madua*

Major Quotes by Nyari

"Coding is all about telling a computer what to do in a particular language"

"Well, the first one is that it's a man's job obviously and it's a global pandemic. I think 20% of people in technical jobs and software are women and yet, when you look at our campus, the women outperform the guys."

"The sky is really the limit."

About WeThinkCode_

WeThinkCode_ offers a free two-year coding course in Johannesburg. Their vision as a non-profit organization is to unlock youth potential by closing the digital skills gap in Africa by teaching programs like game design, app design, cloud computing, cryptography, artificial intelligence, web design, malware, and more. WeThinkCode_ focuses on providing access to real world experience through internships and a clear path to employment upon graduation.

Impact and Excitement

Coding excites Nyari bcause it allows her to solve problems daily. She witnesses the tangible impact of her work, which fuels her drive to continue making a difference.

Nyari Samushonga's journey exemplifies how passion, determination, and a willingness to learn can lead to transformative career shifts. If you're considering a path in coding, take inspiration from Nyari's story and explore the opportunities that lie ahead!
